

## RM250 – Diamond Motor

### High-performance

The RM250 is a high-performance drilling machine designed for use in conjunction with a drilling rig. A 2-speed motor with a maximum drilling diameter of 250mm makes it the ideal machine for a range of coring applications on the construction site.

### Product Advantages

- Integrated friction clutch for highest level of user safety
- 2-speed gear box
- Thermal protection to avoid overheating the motor
- Double shank means the machine is compatible with ½" and 1 ¼" cores

### Noise / Vibration Information

Noise Level with motor 90Db (A)

### Applications

- Plumbing applications
- Electrical system installations
- Air conditioning and heating pipes

### Specification

Model	RM250	
Power	2500W	
Max drilling capacity	Rig Mounted 250mm	
Motor Speeds	Speed 1	Speed 2
Load	0-360rpm	0-850rpm
Diameter	150-250mm	52-150mm
Weight	11kg	
Connection	½" BSP & 1 ¼" UNC	
Cable Length	3m	
Insulation	Class II	
Rig Compatibility	TRIX160 & TRIX350	

### Product Range – RM250 Diamond Motor

Part No.	Description	Order Qty
7E-CORE-RM25-0R	RM250 Diamond Drilling Motor	1
<b>Accessories</b>		
7E-CORE-1727-70	Copper Rings	5
7E-CORE-6220-20	Core Bit Extension ½ x 300mm	1
7E-CORE-6220-70	Core Bit Extension 1-1/4" x 400mm	1
7E-CORE-1727-10	10 Liter Manual Water Pump	1
